Subject: Docket #98N-1038

How DARE the FDA be such a damn SELL OUT agency? You are a total facade if you allow the irradiation of our food by corporations. You are even worse if you allow this horrible practice without requiring them to *clearly* notify all consumers on *each* product that has been poisoned in this way.

If you personally, as an FDA employee, through your job, further this practice may some of your children and grandchildren die from cancer, leukemia and other diseases related to radiating human beings. And each time this happens may you always wonder if this curse and your participation in the selling out of consumers in this society be the reason for those deaths. Save yourself a lot of trouble and work against this selling out of a government agency that is SUPPOSE to protect the public welfare instead of corporations! Please refer this email to appropriate parties so they can consider its contents as well. Sincerely, Nikki Craft
